# BUDWEISER BUDVAR

Budweiser Budvar Brewery has been one of the most successful food processing enterprises in the Czech Republic in the long term. Brewery is a successful continuator of the more than 750-year old brewing tradition in the town of České Budějovice. Brewery brews its lager beer only from high quality raw ingredients that are whole female cons of Saaz hops, Moravian barley malt and water from its own 3 hundred deep Artesian wells. Production process is really traditional without any simplification or compromise including long maturation period of 90 days. Budweiser Budvar Czech Imported Lager is exported to almost 80 countries, counting among the most exported Czech beer brands. The uniqueness of our beer is also confirmed by the fact that the European Union protects the indications of “Budějovické pivo” and “Českobudějovické pivo” by means of the “Protected Geographical Indication” (PGI). The “Protected Geographical Indication” is only granted to products with excellent international reputation and years-long tradition.

**SAY NO  
TO ARTIFICIAL INGREDIENTS**

Thanks to a clear **NO** on adding artificial ingredients, Budweiser Budvar is one of the few Czech beers to use the same ingredients they did 120 years ago. It is the only way to preserve its quality and irreplaceable taste.
